- This product should be used only as directed on the label. It should not be used if you are pregnant or nursing.
- Consult with a physician before use if you have a serious medical condition or use prescription medications.
- A doctor's advice should be sought before using this and any supplemental dietary product.

product summary

Our Kentucky grown, farm fresh full-spectrum CBD oil is naturally rich in terpenes, Omega-3, Omega-6, and Omega-9 Essential Fatty Acids. It has a deep green color and robust natural & fresh flavor; you can taste the goodness in every drop.

- 20mg CBD Per Serving
- Full Spectrum Whole Plant, No Isolates
- High Absorption Sublingual Delivery System
- 100% Legal & Available In 50 States

Our products are manufactured from organically grown, non-GMO hemp, free of chemical fertilizers, herbicides, and pesticides. Our oil is tested multiple times during the manufacturing process for contaminants, heavy metals, mold, and cannabinoid content. Our phytocannabinoid-rich hemp oil is never imported or made from isolates.

We are Farm Bill 2014 FDA compliant. We uphold all state and federal standards and restrictions when it comes to CBD and hemp. Our products are tested by an independent, 3rd-party lab to ensure they are 100% compliant to purchase and market to others. Our CBD oil is made with hemp grown exclusively in Kentucky, as part of the Kentucky Hemp Pilot Program, on old tobacco farms that have been converted to cannabis farms. All of our Kentucky farm partners are fully FDA compliant and support local farm families.

full spectrum matters

Every human possesses an advanced physiological system, the Endocannabinoid System (ECS). The ECS is a crucial regulatory system that is already making cannabinoid-like structures that foster cellular balance throughout nearly every biological system in the body. Research seems to indicate that the ECS might function more properly and efficiently in regulating vital biological functions like sleep, appetite, pain modulation, mood enhancement, and libido through the introduction of hemp-derived cannabinoids like CBD.

Full spectrum CBD oil, unlike CBD isolate products, includes a wide range of cannabinoids present in the hemp plant. Full spectrum means that all available therapeutic compounds a plant has to offer have been extracted.

Therefore, each drop of full spectrum CBD oil has all the same cannabinoids, terpenes, essential fatty acids, and vitamins & minerals present in the industrial hemp plant. Depending on the condition and what you are looking to achieve full spectrum CBD oil can provide a greater effect than CBD isolates as all the cannabinoids work together.
