product summary

Sometimes called "Male Menopause", Andropause is a mid-life phenomenon first described in medical literature in the 1940s that refers to the natural decline in the hormone testosterone. It is estimated that up to 50% of men in their 50s will have testosterone low enough to manifest symptoms of Andropause.

Some men will glide through Andropause symptom-free, while others will experience a range of symptoms that can include erectile dysfunction, decreased libido, mood swings, depression, irritability, tiredness, loss of muscle mass and strength, osteoporosis, increased body fat, cognitive dysfunction, and sleep disturbances.

Balance Natural Essentials Cream For Him is a lightweight, non-greasy lotion that includes Aloe Vera Leaf Juice Powder, Hemp Seed Oil for its incredible moisturizing properties, antioxidant-rich Black Seed Oil that contains both Omega-3 and Omega-6 fatty acids, and essential oils known to have properties that support hormone balance gently and naturally. Perfect for daily use after your shower or bath.

ingredient highlights

Hemp Seed Oil: Reputed to be the most unsaturated oil derived from the plant kingdom, Hemp Seed Oil is a great moisturizer for dry, cracked skin without being so heavy that it clogs pores. It's rich in plant-based phytonutrients and anti-aging antioxidants like Vitamin E. Hemp Seed Oil also contains Gamma-linolenic acid (GLA) which has been shown in studies to help reduce various symptoms related to Andropause.

Black Seed Oil: Used in skincare routines, beautifying baths, and medicinal applications for thousands of years, Black Seed Oil has strong antioxidant and anti-inflammatory properties. Studies have shown Black Seed supports mood, relaxation, and cognition due to its effects on neurotransmitters in the brain and nervous system.

Coriander Seed: With both antioxidant and anti-inflammatory properties, Coriander Seed may protect the heart by lowering blood pressure and LDL (bad) cholesterol while increasing HDL (good) cholesterol. In addition to its effects on blood pressure, Coriander Seed may reduce brain inflammation, improve memory, and reduce anxiety symptoms.

Spikenard: A relative of the Valerian plant, Spikenard has been used for centuries for health purposes. While not as well-known as other essential oils like Lavender or Frankincense, research has shown that Spikenard can reduce neuroinflammation, which may help with anxiety, depression, insomnia, and stress.

what it doesn't have

No GMOs, No Parabens, No Phthalates, No Formaldehyde, No Synthetic Fragrances, No Estrogen, No Steroids, No Dyes, No Hormones, No Synthetic Preservatives, No Petroleum, No Animal Testing
