Black Seed

3000mg Thymoquinone

With a rich history of medicinal use, Black Seed is referenced in the Bible (Isaiah 28:25,27), and some sources indicate that a bottle of it was found in King Tut’s tomb. Research suggests that Black Seed was used by Hippocrates, Pliny the Elder, and Dioscorides as early as the 5th Century BC. Since 1959, hundreds of studies at international universities and publications in various medical journals have reported remarkable results supporting the use of Black Seed, alone or combined with complementary herbs. Black Seed is a valuable source of Essential Fatty Acids Omega 3, 6, and 9. It also contains the powerful phytochemicals Nigellone and Thymoquinone, along with other nutrients that work synergistically to support various functions within the body.

Usage: Shake well before use. Take up to 30 drops (1 full dropper or 1ml).
