product summary

A critical mineral responsible for over 300 enzyme reactions, Magnesium is found in all of our tissues, but mainly in our bones, muscles, and brain. Magnesium is the second most abundant element inside human cells and the fourth most abundant positively charged ion in the human body.

A deficiency in this critical nutrient makes you twice as likely to die as other people, according to a study published in *The Journal of Intensive Care Medicine*. It also accounts for a long list of symptoms and diseases which are easily helped, and often cured, by adding this nutrient.

Magnesium is required for energy production, oxidative phosphorylation, and glycolysis. It contributes to the structural development of bone and is required for the synthesis of DNA, RNA, and the antioxidant glutathione. Magnesium also plays a role in the active transport of calcium and potassium ions across cell membranes, a process that is important to nerve impulse conduction, muscle contraction, and normal heart rhythm.

Early signs of Magnesium deficiency can include loss of appetite, nausea, vomiting, fatigue, and weakness. As Magnesium deficiency worsens additional symptoms may include numbness, tingling, muscle contractions, cramps, seizure, personality changes, abnormal heart rhythms, and coronary spasms. Habitually low intakes of magnesium induce changes in biochemical pathways that can increase the risk of illness over time.

With its role in regulating the thousands of biochemical reactions that occur on an ongoing basis, sufficient Magnesium is essential to achieving the delicate balance necessary to the body's function. The importance of Magnesium ions for life itself, as well as for overall vibrant health, is hard to overstate.

Pain Magnesium Lotion is designed for convenient, optimal topical absorption of magnesium, bypassing the GI tract with no unpleasant laxative effect. Pain Magnesium Lotion soothes sore muscles, cramps, fatigue, and stress. Pain's unique formulation includes essential oils, and it has a calming effect on both the body and mind.

ingredient highlights

- Helichrysum is the first choice for its anti-hematoma properties, with the ability to reduce inflammation and assist vascular dilation, it is an excellent aid for circulatory issues. Like Geranium, it can stop bleeding quickly and promote quick and powerful wound healing. Helichrysum is particularly effective on broken or varicose veins as well as bruising and hematomas from injuries to the skin.
- Clove Bud has an impressive range of action against pathogens and illnesses of all kinds. Clove Bud is an excellent antiseptic, bactericide, and viricide.
- Rosemary ct. 1.8 cineole essential oil has the highest hydrogen content of any plant in the plant kingdom, which explains its strong, warming effect. Applied externally, Rosemary cineole essential oil assists the body with warmth and blood circulation.
