product summary

The prostate, a walnut-sized gland present only in men, is located deep in the pelvis. It's tiny at birth and throughout childhood, but enlarges after puberty, stimulated by rising testosterone levels. Although small compared to other organs, the prostate looms large as a potential source of disease once a man passes middle age.*

Prostate is specifically formulated with essential oils known to have anti-inflammatory and relaxing properties.*

Research has shown that muscle relaxation is vital in relieving a prostate that is chronically inflamed due to hormone imbalance.*

Aromatherapy, combined with herbs and nutrition, can be very beneficial in assisting with prostatitis (inflammation of the prostate).*
