## product summary

The most potent full spectrum product on the market. Nothing added, nothing removed, the way nature intended. Not only does our 2400 mg have more CBD in every drop, but we are less expensive per mg as well.

This product has a robust full CBD Hemp experience with no added flavoring. Added flavoring would make it impossible to reach this level of potency in a 30ml bottle. It has a strong CBD full spectrum natural taste.

- 2922.6mg of full spectrum hemp derivative per 1-ounce bottle
- 0.260% of psychoactive full spectrum hemp derivative by weight
- Approximately 900 drops per 1-ounce bottle
- 3.20mg of hemp extract oil per drop
- Full spectrum whole plant
- High absorption sublingual delivery system
- Naturally rich in phytonutrients, chlorophyll, and terpenes

Our products are manufactured from organically grown, non-GMO hemp, free of chemical fertilizers, herbicides, and pesticides. Our oil is tested multiple times during the manufacturing process for contaminants, heavy metals, mold, and phytocompound content. Our phytocompound-rich hemp oil is never imported or made from isolates.

This means that our CBD has more than just CBD. It's rich in different cannabinoids, terpenes, and most importantly, we leave the chlorophyll intact. This allows your body to absorb all of the plant's benefits with 100% absorption throughout your endocannabinoid system. Be wary of products using isolates as they are chemically processed and no longer contain the other parts of the total hemp plant.

All of our CBD hemp oil batches are thoroughly tested by independent labs and our Certificates of Analysis (COAs) can be viewed on our website.

## full spectrum matters

Every human possesses an advanced physiological system, the Endocannabinoid System (ECS). The ECS is a crucial regulatory system that is already making cannabinoid-like structures that foster cellular balance throughout nearly every biological system in the body. Research seems to indicate that the ECS might function more properly and efficiently in regulating vital biological functions like sleep, appetite, pain modulation, mood enhancement, and libido through the introduction of hemp-derived cannabinoids like CBD.

Full spectrum CBD oil includes a wide range of cannabinoids present in the hemp plant. Full spectrum means that all available therapeutic compounds a plant has to offer have been extracted.

Therefore, each drop of full spectrum CBD oil has all the same cannabinoids, terpenes, essential fatty acids, and vitamins & minerals present in the hemp plant.
