product summary

Inhaling essential oils stimulates an area of the brain called the Limbic System, which governs moods and emotions. The inhalation can trigger varying emotional and physical responses in people, and essential oils with aphrodisiac properties have the ability to invoke romantic feelings.*

Primal is a refreshing, masculine scent that isn't overpowering. It can be used as a cologne, added to a bath, or diluted for use as a body or room spray.*

ingredient highlights

- **Vetiver:** Stimulates the limbic system and acts as a natural aphrodisiac that increases libido and sparks sexual desire. A stress-free mind is a vital requirement for sexual health, and sexual disorders like frigidity, impotence, and lack of libido are often vested with the limbic system of the brain. Vetiver stimulates the limbic system, pacifies the mind, and serves as an effective natural remedy for such health disorders.*
- **Patchouli:** One of the most recognizable fragrances in the world, Patchouli may remind people of the hippie era, but its value is incalculable. It has been known to assist with depression and anxiety, and is widely recognized as an aphrodisiac to stimulate sensual energy and boost the libido. It helps with frigidity, nervous exhaustion, and stress-related complaints.*
- **Neroli:** Not only promotes arousal and increases the libido, but it can also help cure a loss of interest in sex, frigidity, impotence, and erectile dysfunction. Neroli has long been used in weddings because of both its aphrodisiac properties and its ability to calm a bride on her big day. Many Victorian brides wore a sprig of orange blossom in their head dress and carried orange blossoms in their bridal bouquets in an attempt to calm nerves and stimulate romance on the wedding night.*
