

# Fulvic Acid Mineral Powder

essential biominerals

**HB**Naturals  
PRODUCT INFORMATION PAGE

## product summary

Fulvic Acid is a naturally occurring compound created from the decomposition of organic plant matter. It is one component of humus, and can be found in soil, rock sediments, and bodies of water.\*

Fulvic Acid is one of the best electrolytes known to man, and has been found to be an essential component in the metabolic process of living cells. When naturally coupled with minerals through the organic process of humification, fulvic acid is water soluble, highly stable, functions at a wide pH range, and is known as fulvic minerals (fulvates).\*

Fulvic Acid is naturally anti-microbial, anti-bacterial, and anti-fungal. Fulvic Acid naturally provides nutrient density to fruits and vegetables, can remineralize water, and may help replenish trace minerals missing in our diet.\*

Researchers have recently begun studying fulvic acid more closely, and have made some surprising discoveries. Fulvic Acid has the unique ability to react with both negatively and positively charged unpaired electrons and render free radicals harmless. At the cellular level, fulvic acid can help correct cell imbalances, stimulate growth and repair, and support energy production.\*

Manufactured in the USA, our Fulvic Acid Mineral Powder is not a coal derivative. It is non-toxic, gluten-free, non-GMO, bio-degradable, allergen-free, not irradiated, and free of harmful chemicals. It is completely water soluble and contains a remarkable array of 70+ trace minerals, 70+ electrolytes, antioxidants, amino acids, enzymes, and flavonoids.\*

## ingredients

Fulvic acid including natural plant-based minerals, trace minerals, trace elements, electrolytes, amino acids, and flavonoids

## responsible cautions

- Consult with a physician before use if you have a serious medical condition or use prescription medications.
- A doctor's advice should be sought before using this and any supplemental dietary product.
